

ForAfrika

ADOPT A COUNTRY

A family office opportunity — country establishment

ZAMBIA

A catalytic, three-year investment to establish ForAfrika's platform in Zambia and put it on a credible path to self-sustaining, institutionally-backed operations.

TOTAL ASK

\$500K a year

over three years · \$1.5M in total

YEAR 1: \$200K country establishment
+ \$300K initial programmes

In Zambia, around 64% of the population lives on less than \$2.15 a day and more than a third of children under five are stunted. The 2024 drought, declared a national disaster, destroyed over 40% of the country's maize crop and pushed 5.8 million people into crisis-level food insecurity. Now, as new investment flows into the Copperbelt and North-Western Province along the Lobito Corridor, there is a real opportunity to make sure that growth reaches the communities around it. A three-year, \$500,000-a-year commitment from a single family office establishes ForAfrika in Zambia at this moment: a founding platform credible enough to draw in the institutional, commercial and mining-sector funding needed to sustain it long after your catalytic capital has done its job.

PARTNERS ALREADY ON THE GROUND

ForAfrika enters Zambia alongside established Zambian partners with staff, equipment and government relationships already in place: borehole drilling and livestock value chains reaching 45,000+ people; TEVETA-registered construction and youth skills training; and microfinance serving 10,000+ active clients in Corridor districts.

THREE-YEAR PATH TO A SELF-STANDING PLATFORM

Your capital is catalytic, not permanent. Each year is designed to reduce ForAfrika Zambia's dependence on this single source of funding and replace it with diversified, durable support.

YEAR 1 · ESTABLISH \$500K — 100% family office	YEAR 2 · SCALE \$500K — blended w/ early institutional co-funding	YEAR 3 · SUSTAIN \$500K — family-office share falling
FOCUS  Country establishment & first integrated programmes	FOCUS  Geographic expansion & economic pathways	FOCUS  Diversification & transition
MILESTONES  Registered & operational in Zambia; Country Representative recruited, Lusaka office and Solwezi field hub open, with core team, logistics and monitoring systems live; WASH, food security & livelihoods programmes launched with local partners in drought-affected and mine-host communities.	MILESTONES  Presence extends from North-Western Province into the Copperbelt; certified local workforce and enterprise finance pathways added; first co-funding proposals submitted to U.S. Government, institutional and mining-sector partners with Corridor community commitments.	MILESTONES  Multiple institutional and corporate funding relationships active; ForAfrika Zambia holds its own compliance, quality and reporting as a full country platform; market-linkage and commercial-viability programming launched with ForAfrika's Social Enterprise division.
FUNDING OUTLOOK  Fully catalytic: building the credibility base other funders will require.	FUNDING OUTLOOK  Family-office capital blended with early institutional and mining-sector co-funding.	FUNDING OUTLOOK  Institutional and commercial revenue rise as your share falls, and the platform stands on its own.

WHY FORAFRIKA, WHY NOW

A country of contrasts: mineral wealth alongside some of the highest poverty and child stunting rates in the world, with rural households still recovering from the 2024 drought.

A low-risk entry: Zambia is stable and peaceful, with an established NGO regulatory framework, and Zambian partners already delivering at scale.

Reach across the region: ForAfrika already works at the Corridor’s Atlantic end in Angola.

Investment is arriving: the realigned \$491M MCC Zambia Compact and new mining investment along the Lobito Corridor are directing funding and attention to North-Western and Copperbelt Provinces now.

TRACK RECORD

- Angola, Corridor terminus:** 729,463 people reached in 2024, including 11 boreholes serving 22,000 people in Benguela Province.
- Cabo Delgado, Mozambique (WASH, German Federal Foreign Office, €2M, 2023–26):** 202,427 people reached; safe-water access rose from 19.9% to 80.4%.
- South Africa corporate partnerships:** a portfolio funded almost entirely by extractive, industrial and financial-sector partners across all nine provinces.

Evidence is drawn from comparable ForAfrika operations elsewhere on the continent.

GOVERNANCE, ACCOUNTABILITY & RISK

Registration with Zambian authorities is a Year 1 milestone; ForAfrika runs SAGE ERP financial systems with annual audits across its country platforms.

Local partners are assessed on governance, financial management, procurement and safeguarding before any sub-grant; funds are released in tranches tied to verified delivery.

Safeguarding, PSEA, anti-fraud, procurement and financial-control policies, plus audited financial statements, are available on request during due diligence.

Expansion beyond the first districts is phased and conditional on need, partner capacity, funding and approvals, which limits execution risk for funders.

HOW PROGRESS IS MEASURED

SUSTAINABLE LIVELIHOODS INDEX	COMMERCIAL VIABILITY INDEX (Under Development)	THRIVABILITY INDEX (Under Development)
Tracks household progress toward self-sufficiency — Phase 1 of the Dynamic Development Continuum.	Tracks the shift toward markets, cooperatives and supply chains — Phase 2 of the continuum.	Combines both indices into a single measure of self-sufficiency plus commercial viability.

WHAT YOUR PARTNERSHIP INCLUDES

- Recognition as the founding family-office partner of ForAfrika’s Zambia country platform.
- Regular impact reporting against agreed milestones and indicators.
- Direct access to ForAfrika’s country and global leadership for questions, updates and field visits along the Corridor.

Reporting cadence and engagement details to be confirmed directly with ForAfrika.

For family offices seeking a measurable, catalytic investment, this is an opportunity to help Zambia’s growth reach the communities who need it most, and help build a Zambia that thrives. Your investment establishes ForAfrika’s platform in Zambia, with a country programme designed to stand on its own within three years.
